

Irrigation Repair Request

DATE _____

STREET ADDRESS: _____

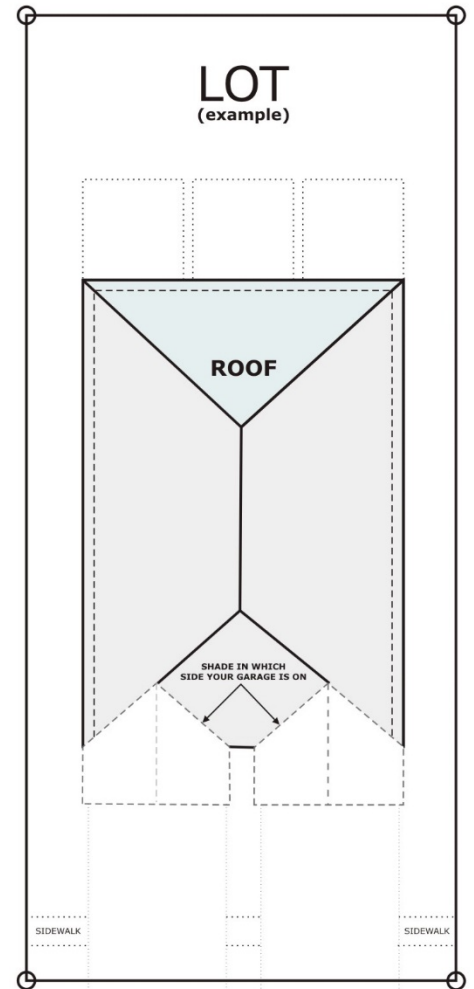

NAME: _____ BEST CONTACT # _____ LOT: _____

The irrigation system only runs every 3rd day regardless of drought conditions. The reasoning for this is to force the grass to seek water further down in the dirt. This will establish a better root system and improve the overall health of the grass. Please do not use this form to request a schedule change for the system to run more frequently.

The diagram shown approximates your home and lot. It is not an exact drawing as each home can be different. The bottom portion gives you the ability to draw and shade in the dotted lines to indicate which side your garage is located, and you can rough in the landscaping beds accordingly, should the problem be in that area. The rear of the home also has places where you might have a covered patio or screened in porch.

USE THIS DIAGRAM TO ILLUSTRATE SPRINKLER LOCATIONS YOU ARE HAVING ISSUE WITH. **IF YOUR IRRIGATION IS NOT WORKING AT ALL, YOU WILL NOT NEED TO UTILIZE THE DRAWING.** PLEASE MARK BELOW WHAT BEST DESCRIBES THE ISSUES YOU ARE HAVING AND GIVE AS MUCH DETAIL AS POSSIBLE IN THE SPACE PROVIDED:

- BROKEN SPRINKLER HEADS
- BROKEN PIPE AND/OR LEAK
- INCORRECT COVERAGE AREA
- LACK OF PRESSURE
- OTHER (BE SPECIFIC)

CHECK HERE IF: YOU HAVE DONE LANDSCAPING OR ANY OTHER CHANGES ON YOUR PROPERTY THAT IMPACTS YOUR SPRINKLER SYSTEM. IT IS YOUR RESPONSIBILITY TO CALL (502) 243-7007 AND NOTIFY **EVERGREEN IRRIGATION** THAT YOU WILL BE WORKING WITH THEM, AT YOUR EXPENSE, TO ADJUST/MODIFY YOUR SYSTEM AS NEEDED. THEY WILL EXPECT PAYMENT AT THE TIME OF SERVICE AND DO NOT HAVE THE CAPACITY TO SEND YOU A BILL.

Please email this form to mulloyirrigation@gmail.com or mail to the address below.
